SEM-I (NEP) ATKT EXAM APRIL - 2026

Date: 15/04/2026

FYBCOM: SEMESTER- I

(As per NEP 2020 Syllabus Academic Year 2025-26)

SUBJECT: QUANTITATIVE TECHNIQUES – I

Total Marks:30 **Duration: 1 hour**

NOTE:

1. **Attempt any TWO questions out of Q-I, Q-II & Q-III.**
2. **All questions carry equal marks.**
3. **Use of simple calculator is allowed.**

Q-I Attempt any Three out of Four: **[15 Marks]**

a) Simplify : $5\frac{7}{6} + 16\frac{2}{3} + 18\frac{4}{9} - 13\frac{5}{6}$

b) A and B can do a job in 12 hours, B and C can do the same job in 15 hours, C and A can do the same job in 20 hours. How much time will A, B, C all together will take to do this job.

c) If in 1 hour, a boat sails upstream and downstream 9 kms and 15 kms, what is its still boat speed and stream speed?

d) If an article is sold for Rs. 178 at a loss of 11%, what should be its selling price in order to earn a profit of 11%?

Q-II Attempt any Three out of Four: **[15 Marks]**

a) (i) If a:b is 5:6 and b:c is 2:9, find out a:b:c.

(ii)The measures of the angles of the triangles are in the ratio 3:4:5, find the angles.

b) There exists 45 people in an office. Out of which female employees are 25 and the remaining are male employees. Find the ratio of

(i) The count of females to males

(ii) The count of males to females.

[P.T.O]

c) Find the AM, GM & HM for three numbers 4, 8,16.

d) There are two taps A & B which can fill a tank in 3 hrs and 5 hrs respectively, However, there is a hole in the tank which can empty the tank in10 hrs. Assuming that the tank was empty initially and if the two taps are opened and the hole goes un-noticed we will find out when the entire tank will be full?

Q-III Attempt any Three out of Four: **[15 Marks]**

a) Find the L.C.M of 77 ,66 and 88 and solve $\frac{18}{77}+\frac{23}{66}+\frac{31}{88}$.

b) Do as directed:

(i) What % of 300 is 150?

(ii) Find 50% of 1000.

(iii) Convert fraction $\frac{8}{5}$ to %

c) For a student to clear an examination, he must score 65% marks. If he gets 120 and fails by 70 marks, what is the total marks for the examination?

d) Two train length 150 meters and 200 meters, are coming towards each other. If their respective speeds are 45m/s and 50 m/s,

(i) how long they would take to cross each other?

(ii) In case they are going in the same direction, how long they would take to pass each other?

X.....X.....X.....

   a) Write a note on project planning
   b) What are the types of foreign collaboration

(SEM-I) (NEP) ATKT EXAM APRIL - 2026

Date: 18/04/2026

MALINI KISHOR SANGHVI COLLEGE OF COMMERCE & ECONOMICS

SUBJECT: Practical Statistics for Commerce. (30 Marks)

CLASS: F.Y.B.Com. **SEM-I** **SEAT NO.**

Name:

Note: (i) Attempt any five Questions out of eight (Each question is 6 marks)
(ii) Simple Calculator is allowed
(iii) Graph papers will be provided on request.

Q-1 What is Median? A survey was conducted to find the number of hours teenagers spend on social media per week. The data is presented below. Find the value of Median.

Hours	0 – 5	5 – 10	10 – 15	15 – 20	20 – 25
Frequency	4	6	10	12	8

Q-2 Calculate the standard deviation for the following distribution giving exports of 100 companies.

Exports (in lakhs of Rs.):	0-30	30-60	60-90	90-120	120-150	150-180
No. of Companies :	8	15	25	32	16	4

Q-3 What is measure of dispersion? There are 30 sample of ball bearing from factory to find number of defects. Following number of defects are found. Find the range and coefficient of range.

2	1	3	4	1	1	2	3	4	1	5	3	2	2	1
0	0	1	2	3	2	1	0	1	3	4	3	5	0	2

Q-4 The age of 20 boys in a locality is given below. Find the Mean, Median and Mode

Age in Years	12	10	15	14	8
Number of Boys	5	3	2	6	4

Q-5 A consumer goods company has set up the following pay off table for the sales returns of their product. Three strategies (A_1, A_2, A_3) are identifies to deal with three uncertain states of nature (S_1, S_2, S_3).

	S_1	S_2	S_3
A_1	7000	3000	1500
A_2	5000	4,500	0
A_3	3000	3000	3000

You are required to identify right strategy under the following criteria: (2) Maximax (3) Laplace Criteria

Q-6 A local investor is considering three alternative real estate investments-a motel, a theatre and a restaurant. The motel and theatre will adversely or favourably affected depending on the availability of gasoline, while the restaurant will be relatively stable for any condition. The pay off table under uncertainty for decision frame work is

Pay off Table

Investment Alternative	Gasoline Availability		
	Shortage	Stable	Surplus
Motel	-80,000	1,00,000	2,50,000
Theatre	-1,20,000	80,000	40,000
Restaurant	60,000	60,000	60,000

Determine the best investment under conditions of uncertainty using Minimax regret

Q-7 A farmer wants to decide which of the three crops he should plant on his farm. The profit from each is dependent on the rainfall during the season. He has categories the rainfall as substantial, moderate or light. He estimates his profit for each crop as shown in the table:

Course of action	Rainfall		
	Substantial	Moderate	Light
Crop A	7000	3500	1000
Crop B	2500	3500	4000
Crop C	4000	4000	3000

Depending on projection for the coming season, he estimates the probability of substantial rainfall as 0.2 of moderate rainfall, 0.3 and that of light rainfall as 0.5. Draw the tree diagram and determine the optimal decision as to which crop to plant using EMV criteria.

Q-8 A farmer wants to decide which of the three crops he should plant on his farm. The profit from each is dependent on the rainfall during the season. He has categories the rainfall as substantial, moderate or light. He estimates his profit for each crop as shown in the table:

Course of action	Rainfall		
	Substantial	Moderate	Light
Crop A	7000	3500	1000
Crop B	2500	3500	4000
Crop C	4000	4000	3000

Depending on projection for the coming season, he estimates the probability of substantial rainfall as 0.2 of moderate rainfall, 0.3 and that of light rainfall as 0.5. determine the optimal decision as to which crop to plant using EOL criteria.
